**Table 7 National Option Character Support.**

\* OSD = On Screen Display graphics. Baltic = Lettish and Lithuanian.

Table 8 above shows the support given by various Eurotext devices to the National Options mainly as defined in the Teletext Specification. Other languages are supported by the use of some of the above National Options, and characters transmitted in Packet 26 (e.g. Icelandic uses the Spanish National Option characters and some special characters via Packet 26). A table of the additional languages supported in this way is given below:

<b>National Option Character Set</b>	<b>Languages Supported</b>
German	Dutch, Flemish
Swedish*	Norwegian, Danish *, Finnish *, Greenland, Hungarian *
Spanish*	Basque *, Portuguese *, Catalan *, Faroese *, Icelandic *
Czech*	Slovak*
Serbo-Croat	Croat-Serbian, Slovenian, Croatian, Albanian

**Table 8. Additional language support**

\* = On-chip (flicker-free) processing of packet 26 characters supported.
